

Node Auth Tutorial (JWT)

#8 - Auth Views

In this Node authentication tutorial we'll get started on the auth views so we can start to send requests to signup from the front-end of the website.

express

```
<form action="/signup">
  <h2>Sign up</h2>
  <label for="email">Email</label>
  <input type="text" name="email" required />
  <div class="email error"></div>
  <label for="password">Password</label>
  <input type="password" name="password" required />
  <div class="password error"></div>
  <button>Sign up</button>
</form>

<%- include('partials/footer'); -%>

<script>
  const form = document.querySelector('form');
  form.addEventListener('submit', (e) => {
    e.preventDefault();
    // get values
    const email = form.email.value;
    const password = form.password.value;
    console.log(email, password);
  });
</script>
```
